EDUCATION

California State University Long Beach

Bachelor of Science in Computer Science

Expected: June 2027

Long Beach, CA

Relevant Coursework: Data Structures, Algorithms, Discrete Mathematics, Object-Oriented Application Development, Digital Logic and Assembly Programming

TECHNICAL EXPERIENCE

Zayed Software LLC — Software Engineer & Founder

LineReady · *React, Supabase/PostgreSQL, Capacitor, PostHog* · iOS + Web

2026 - Present

- Built and launched a multi-tenant restaurant operations platform with a 77% weekly active-user rate among 40 registered employees at a 90-employee Chick-fil-A store, replacing paper checklists and group chats for scheduling, training, food-safety logs, and team messaging.
- Designed PostgreSQL row-level-security tenant isolation, a 5-tier role/permission system, and invite-code onboarding; shipped web and iOS clients from one React + Capacitor codebase.
- Localized 1,367 English/Spanish strings and added mandatory video training with watch tracking to support adoption across bilingual shifts.

Mini Golf Score Tracker · *Flask, JWT, Turso/SQLite, React, Capacitor* · iOS + Web

2025 - Present

- Launched a multiplayer scorekeeping app to the iOS App Store and web, backed by a 15-endpoint Flask REST API with JWT authentication, PBKDF2-HMAC password hashing, and per-user authorization scoping.
- Diagnosed a production deadlock between libSQL's embedded async runtime and gunicorn's threaded workers; wrote a pure-Python DB-API 2.0 client for Turso's Hrana HTTP protocol, restoring stable service and open-sourced as [turso-http](#).

LockedIn · *React 19 + Vite, Flask, Supabase/PostgreSQL, Capacitor* · Private beta (TestFlight)

2025 - Present

- Built a GLP-1 tracking application with dose logging, titration schedules, injection-site rotation, and dose-vs-weight analytics against a 321K-record public nutrition dataset, localized in English, Spanish, and Arabic.
- Implemented a subscription paywall and write-once creator-code attribution with server-side validation and PostHog funnel instrumentation.

WORK EXPERIENCE

Chick-fil-A Foothill Ranch — Director

Mar. 2022 - Present

Promoted from Team Member → Shift Lead → Director (Jun. 2024). Foothill Ranch, CA.

- Improved corporate CEM customer-satisfaction scores from 59% to 74% over two years by launching targeted service initiatives and coaching leaders weekly.
- Deployed the store's internal software stack — [LineReady](#), [cfafoothill.com](#), and a [team portal](#) handling time-punch adjustments, sick pay, and leadership applications — reaching daily adoption by 40+ team members across the 90-employee store.
- Held labor cost within corporate target during peak rushes by building demand-forecasted schedules for 40+ employees around hourly customer forecasts.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C++, C, SQL

Frontend & Mobile: React, Capacitor (iOS), HTML/CSS, Vite

Backend & Data: Flask, PostgreSQL, Supabase (row-level security), SQLite, Turso (libSQL), REST APIs, JWT authentication

Tools: Git, Xcode, App Store Connect, PostHog, Netlify, Render
