EDUCATION

California State University Long Beach

Bachelor of Science in Computer Science

Expected: June 2027

Long Beach, CA

Relevant Coursework: Data Structures, Algorithms, Discrete Mathematics, Object-Oriented Application Development, Digital Logic and Assembly Programming

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C++, C, SQL

Frameworks & Platforms: React, Flask, PostgreSQL (Supabase, row-level security), SQLite, Turso (libSQL), Capacitor (iOS), REST APIs, JWT authentication, PostHog, HTML5, CSS

Tools & Concepts: Git/GitHub, Xcode, VS Code, App Store Connect, Netlify, Render, Object-Oriented Programming, Agile Methodology, Internationalization (EN/ES/AR)

PROJECTS - FOUNDER, ZAYED SOFTWARE LLC

LineReady - Shift-operations platform for quick-service restaurants (iOS App Store + Web)

- Shipped a multi-tenant SaaS to iOS App Store and web from one codebase, replacing paper checklists and group chats for a live 40-user restaurant operation, by designing PostgreSQL row-level-security data isolation, 5-tier role permissions, and invite-code onboarding with React, Supabase, and Capacitor.
- Reached 77% weekly-active usage among a 40-user team as measured by PostHog analytics, by deploying LineReady as the store's daily operating system for scheduling, training, food-safety logs, and team chat.
- Unlocked full participation for Spanish-speaking crews as measured by bilingual adoption across daily shifts, by shipping full localization across 1,367 English/Spanish translation keys plus mandatory video training with watch tracking.

LockedIn - Health tracker built for GLP-1 medication users (iOS)

- Engineered a full-stack GLP-1 tracker spanning dose logging, titration schedules, injection-site rotation, and dose-vs-weight analytics against a 321k-food nutrition database, by building a React front end over a Flask/PostgreSQL API localized in English, Spanish, and Arabic.
- Enabled revenue and referral tracking from launch day as instrumented end to end in PostHog, by implementing a subscription payroll and affiliate attribution system with creator codes, write-once referral tracking, and a public code-validation API.

Mini Golf Score Tracker - Multiplayer scorekeeping app (iOS App Store + Web)

- Shipped a full-stack multiplayer score tracking app to the iOS App Store and the web with zero unauthorized access incidents as measured over one year in production, by building a 15-endpoint Flask REST API with JWT authentication, PBKDF2-HMAC password hashing, and per-user authorization scoping.
- Restored production uptime after diagnosing a deadlock between libSQL's embedded async runtime and unicorn's threaded workers as observed in server logs, by writing a pure-Python DB-API 2.0 client for Turso's Hrana HTTP protocol.

WORK EXPERIENCE

Chick-fil-A

Foothill Ranch, CA

Director

Jun. 2024 - Present

- Raised customer satisfaction from 59% to 74% in two years as measured by corporate CEM scores, by designing targeted service initiatives and leading weekly leader coaching sessions for a team of 40+ employees.
- Streamlined operations for a 90-person team as measured by daily adoption of 40+ software users across three internal tools, by building and deploying the store's software stack: LineReady, cfafoothill.com, and a team portal handling time-punch adjustments, sick pay, and leadership applications.
- Held labor cost within corporate target during peak rushes as measured by weekly labor % vs. budget, by building demand-forecasted schedules for 40+ employees around hourly customer forecasts.

Shift Lead

Jun. 2023 - Jun. 2024

- Strengthened hiring quality as measured by improved new-hire retention through the first 90 days, by conducting structured behavioral interviews and developing evaluation criteria aligned with company culture and operational needs.

Team Member

Mar. 2022 - May 2023

- Delivered consistent guest experience during high-volume peaks as measured by internal service scores and repeat guest feedback, by owning drive-thru window operations and coaching newer team members on order accuracy standards.
